ELSEVIER International Journal of Mass Spectrometry and Ion Processes 145 (1995) 213–216

Subject Index

Ab initio MO calculations
The decarbonylation of ionized formamide, H–C(=O)–$NH_2^{+\cdot}$, and aminohydroxycarbene, HO–C–$NH_2^{+\cdot}$: decay via an excited state. A quantum chemical investigation 35
Ab initio molecular dynamics
Multifragmentation of fullerenes: a molecular dynamics statistical trajectory ensemble study of a cross-beam experiment 203
Aberration
Estimation of ion beam spread due to field instabilities 45
Association reaction
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155

Beam-induced processes
Utilization of electrospray ionization to gain information on the processes involved in $[M - H]^+$ formation in FAB/LSIMS 123
Bimolecular reaction
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155

Carbene
The decarbonylation of ionized formamide, H–C(=O)–$NH_2^{+\cdot}$, and aminohydroxycarbene, HO–C–$NH_2^{+\cdot}$: decay via an excited state. A quantum chemical investigation 35
Charge stripping
State-selective single-charge stripping of metastable Ar^+ ions 109
CID
Fragmentation of organosulfur compounds upon electron impact: 2-mercaptoethanol and 1,2-ethanedithiol 25

Coalescence
Mass distribution of C_{60} and C_{70} coalescence products produced by direct laser vaporization 1
Collisional dissociation
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155
Collisional stabilization
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155
Condensed phase
Utilization of electrospray ionization to gain information on the processes involved in $[M - H]^+$ formation in FAB/LSIMS 123
Coupled oscillators
Analysis of space–charge effects in cyclotron resonance mass spectrometry as coupled gyrator phenomena 139
Cycloalkenes
A plasma desorption mass spectrometry study of CH_n^+ and $C_2H_n^+$ ion formation from frozen organic surfaces 9

Data transfer protocol
A recommended data transfer protocol for isotope mass spectrometric measurement data 117
Direct laser vaporization
Mass distribution of C_{60} and C_{70} coalescence products produced by direct laser vaporization 1
Dissociative ionization energy
Chemical form effects on the surface ionization of lithium halides 131

Electrospray
Utilization of electrospray ionization to gain information on the processes involved in $[M - H]^+$ formation in FAB/LSIMS 123

Emission spectroscopy
Electronic excitation of NO by the ion/ion neutralization reaction between NO^+ and $C_6F_5CF_3^-$ at thermal energy 165
External ion source
Capture of externally produced ions in an ICR cell by ion–surface collisions 197

FAB/LSIMS
Utilization of electrospray ionization to gain information on the processes involved in $[M - H]^+$ formation in FAB/LSIMS 123
FALP
Reactions of H_3O^+ and OH^- ions with some organic molecules; applications to trace gas analysis in air 177
Field instability
Estimation of ion beam spread due to field instabilities 45
Flowing afterglow
Electronic excitation of NO by the ion/ion neutralization reaction between NO^+ and $C_6F_5CF_3^-$ at thermal energy 165
Fourier transform ion cyclotron resonance
Capture of externally produced ions in an ICR cell by ion–surface collisions 197
Fourier transform mass spectrometry
Analysis of space–charge effects in cyclotron resonance mass spectrometry as coupled gyrator phenomena 139
Fragment ion formation
A plasma desorption mass spectrometry study of CH_n^+ and $C_2H_n^+$ ion formation from frozen organic surfaces 9
Fullerene cations
Repeated addition of atomic hydrogen to fullerene cations, dications and trications 79
Fullerene
Mass distribution of C_{60} and C_{70} coalescence products produced by direct laser vaporization 1
Multifragmentation of fullerenes: a molecular dynamics statistical trajectory ensemble study of a cross-beam experiment 203

Heats of formation
Fragmentation of organosulfur compounds upon electron impact: 2-mercaptoethanol and 1,2-ethanedithiol 25
High mass proteins
Observation of mixed molecular cluster ions in matrix-assisted UV laser desorption/ionization of high mass protein mixtures L9
Hydrogen atoms
Repeated addition of atomic hydrogen to fullerene cations, dications and trications 79

Image width
Estimation of ion beam spread due to field instabilities 45
Internal state distribution
Electronic excitation of NO by the ion/ion neutralization reaction between NO^+ and $C_6F_5CF_3^-$ at thermal energy 165
m-Iodotoluene ion
Reinvestigation of the photodissociation kinetics of *m*-iodotoluene molecular ion 187
Ion optics
Estimation of ion beam spread due to field instabilities 45
Ion trapping
Capture of externally produced ions in an ICR cell by ion–surface collisions 197
Ion–surface collisions
Capture of externally produced ions in an ICR cell by ion–surface collisions 197
Ion/ion neutralization
Electronic excitation of NO by the ion/ion neutralization reaction between NO^+ and $C_6F_5CF_3^-$ at thermal energy 165
Ion/molecule reactions
Reactions of H_3O^+ and OH^- ions with some organic molecules; applications to trace gas analysis in air 177
Repeated addition of atomic hydrogen to fullerene cations, dications and trications 79
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155
Ionization efficiency
Chemical form effects on the surface ionization of lithium halides 131
Ionization energies
The ionization energies of polychlorinated dibenzo-*p*-dioxins: new experimental results and theoretical studies 97
Ionization
Utilization of electrospray ionization to gain information on the processes involved in $[M - H]^+$ formation in FAB/LSIMS 123
Isotope effect
The decarbonylation of ionized formamide, H–C(=O)–$NH_2^{\cdot+}$, and aminohydroxycarbene, HO–C–$NH_2^{\cdot+}$: decay via an excited state. A quantum chemical investigation 35

Isotope mass spectrometric measurement data
A recommended data transfer protocol for isotope mass spectrometric measurement data 117

Kinetic energy release distribution
Reinvestigation of the photodissociation kinetics of *m*-iodotoluene molecular ion 187

Laser desorption
In situ analysis of surfaces and mixtures by laser desorption mass spectrometry 51
Laser ionization
In situ analysis of surfaces and mixtures by laser desorption mass spectrometry 51
Lithium halides
Chemical form effects on the surface ionization of lithium halides 131

MALDI
Observation of mixed molecular cluster ions in matrix-assisted UV laser desorption/ionization of high mass protein mixtures L9
MALDI-TOF mass spectra
High resolution MALDI-TOF mass spectra of three proteins obtained using space–velocity correlation focusing L1
Mass distribution
Mass distribution of C_{60} and C_{70} coalescence products produced by direct laser vaporization 1
In situ analysis of surfaces and mixtures by laser desorption mass spectrometry 51
Mass spectrometry
Observation of mixed molecular cluster ions in matrix-assisted UV laser desorption/ionization of high mass protein mixtures L9
Matrices
Observation of mixed molecular cluster ions in matrix-assisted UV laser desorption/ionization of high mass protein mixtures L9
MIKE
Fragmentation of organosulfur compounds upon electron impact: 2-mercaptoethanol and 1,2-ethanedithiol 25
Mixed molecular cluster ions
Observation of mixed molecular cluster ions in matrix-assisted UV laser desorption/ionization of high mass protein mixtures L9
Mixture analysis
In situ analysis of surfaces and mixtures by laser desorption mass spectrometry 51

Modulation
Analysis of space–charge effects in cyclotron resonance mass spectrometry as coupled gyrator phenomena 139
Molecular cross-beam collision
Multifragmentation of fullerenes: a molecular dynamics statistical trajectory ensemble study of a cross-beam experiment 203
Molecular fragmentation
Multifragmentation of fullerenes: a molecular dynamics statistical trajectory ensemble study of a cross-beam experiment 203
Molecular multifragmentation
Multifragmentation of fullerenes: a molecular dynamics statistical trajectory ensemble study of a cross-beam experiment 203

Photodissociation kinetics
Reinvestigation of the photodissociation kinetics of *m*-iodotoluene molecular ion 187
Polychlorinated dibenzo-*p*-dioxins
The ionization energies of polychlorinated dibenzo-*p*-dioxins: new experimental results and theoretical studies 97
Proteins
High resolution MALDI-TOF mass spectra of three proteins obtained using space–velocity correlation focusing L1
Proton transfer
Reactions of H_3O^+ and OH^- ions with some organic molecules; applications to trace gas analysis in air 177

Quasi-equilibrium
A plasma desorption mass spectrometry study of CH_n^+ and $C_2H_n^+$ ion formation from frozen organic surfaces 9

Rate constant
Reinvestigation of the photodissociation kinetics of *m*-iodotoluene molecular ion 187
Raw data output file
A recommended data transfer protocol for isotope mass spectrometric measurement data 117
Reaction rate coefficients
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155
Recombination
A plasma desorption mass spectrometry study of CH_n^+ and $C_2H_n^+$ ion formation from frozen organic surfaces 9

Recrystallization
Observation of mixed molecular cluster ions in matrix-assisted UV laser desorption/ionization of high mass protein mixtures L9
Resolution
Estimation of ion beam spread due to field instabilities 45
Resonance-enhanced two-photon ionization
The ionization energies of polychlorinated dibenzo-*p*-dioxins: new experimental results and theoretical studies 97
RRKM theory
Reinvestigation of the photodissociation kinetics of *m*-iodotoluene molecular ion 187

Saha–Langmuir equation
Chemical form effects on the surface ionization of lithium halides 131
Selected ion flow drift tube
Selected ion flow drift tube studies of the reaction of $Si^+(^2P)$ with C_2H_4. Observation of the ternary reaction with two channels: collisional stabilization and collisional dissociation 155
Semiempirical/ab initio quantum chemical calculations
The ionization energies of polychlorinated dibenzo-*p*-dioxins: new experimental results and theoretical studies 97
SIFT
Reactions of H_3O^+ and OH^- ions with some organic molecules; applications to trace gas analysis in air 177
SIFT technique
Repeated addition of atomic hydrogen to fullerene cations, dications and trications 79
Space–charge effects
Analysis of space–charge effects in cyclotron resonance mass spectrometry as coupled gyrator phenomena 139
Spin conservation
State-selective single-charge stripping of metastable Ar^+ ions 109
Surface analysis
In situ analysis of surfaces and mixtures by laser desorption mass spectrometry 51
Surface crossing
The decarbonylation of ionized formamide, H–C(=O)–$NH_2^{\cdot+}$, and aminohydroxycarbene, HO–C–$NH_2^{\cdot+}$: decay via an excited state. A quantum chemical investigation 35
Surface ionization
Chemical form effects on the surface ionization of lithium halides 131

Thermodynamic modeling
A plasma desorption mass spectrometry study of CH_n^+ and $C_2H_n^+$ ion formation from frozen organic surfaces 9
Thiol
Fragmentation of organosulfur compounds upon electron impact: 2-mercaptoethanol and 1,2-ethanedithiol 25
Time-of-flight mass spectrometry
Mass distribution of C_{60} and C_{70} coalescence products produced by direct laser vaporization 1
The ionization energies of polychlorinated dibenzo-*p*-dioxins: new experimental results and theoretical studies 97

Trace gas analysis
Reactions of H_3O^+ and OH^- ions with some organic molecules; applications to trace gas analysis in air 177
Translational energy spectroscopy
State-selective single-charge stripping of metastable Ar^+ ions 109

Unimolecular chemistry
The decarbonylation of ionized formamide, H–C(=O)–$NH_2^{\cdot+}$, and aminohydroxycarbene, HO–C–$NH_2^{\cdot+}$: decay via an excited state. A quantum chemical investigation 35
